GOLDEN SEA-DRIVE®: GOLDEN'S EXCLUSIVE SEA-DRIVE® HAS PASSED THE TEST OF TIME

We have now been using the SEA-DRIVE® for over 10 years with over 20,000 units worldwide. During this time we have never had one failure or back drive. There is no other boat lift manufacturer in the world that could make that claim. Our competitors use off the shelf gear boxes that are simply not designed to withstand the shock loads and harsh environments boat lifts are subjected to. Our proprietary SEA-DRIVE® was designed specifically for boat lifts with the harshest environments in mind, making it the most robust and reliable gear drive on the market today.

FEATURES

The "SEA-Drive" is an aluminum die-cast enclosure, housing dual worm gear reducers. This configuration assures that the gear box will never back drive. It was designed to function safely and reliably without the need for an electric brake. Our system connects the Sea-Drive® directly to the boat lift drive shaft with an over sized 5/8" hardened drive pin, designed to handle the high output torque the Sea-Drive® produces.

GEARBOX	RATIO	INPUT HP	OUTPUT TORQUE
 Single Worm Gear 60:1 Chain & Sprocket 5:1	60:1	.47	602
 Single Worm Gear 60:1 Chain & Sprocket 5:1	60:1	.40	864
 Single Worm Gear 60:1 Chain & Sprocket 5:1	60:1	.58	890
 Double Reduction	500:1	.42	3356
 Flat Plate	480:1	1.0	4000
 E-Drive	480:1	1.0	4000
 Sea-Drive PATENT NUMBER 7,850, 147	480:1	.98	8000

Sea-Drive® Patent: # 7,850,147

Golden is ISO Certified and follows the guidelines of the ISO 9001 standard.
