ADJUSTABLE BUNK ASSEMBLY:

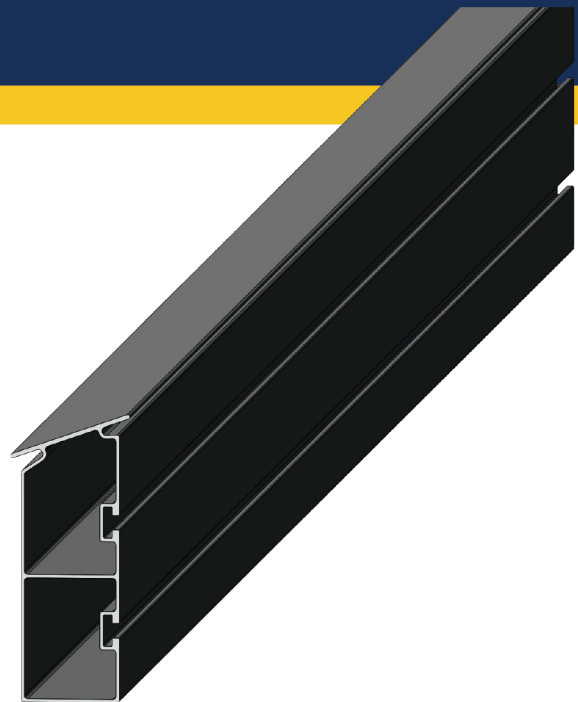

Golden's patent-pending multi-directional adjustable bunk assembly revolutionizes marina operations with a design tailored for the ever-changing demands of vessel accommodations. Unlike traditional systems that require drilling multiple holes and permanently mounting bunks, Golden's innovative slotted bunks utilize carriage bolts for quick, hassle-free installation.

This forward-thinking approach eliminates the need to drill up to 16 holes over water, reducing installation time by 30 to 60 minutes. It also prevents the common issue of crushing aluminum bunks from overtightened bolts, ensuring durability and longevity. Moreover, when adjustments are needed, our slotted bunks leave no unsightly or damaging holes, offering a clean and efficient solution for reconfiguring lifts to accommodate different boats.

This new product is a true win/win for marine contractors, marinas and end users by saving time, enhancing versatility and complimenting safety.

FEATURES

- 1) 6061-T6 Marine grade aluminum
- 2) Slotted to accommodate a carriage (no drilling required)
- 3) Durable, efficient means for adjusting bunks as boats change

Boat Lift Bunk with Integral T-Slot Nonprovisional 18/418,873

Golden has been Certified by
DQS Inc. to ISO 9001:2015
